

SCAD Smart Seling is a Mobile Sales Force Automation Solution which allows sales personnel to perform order entry, inventory monitoring and collection enquiries using smart device or handheld terminal, providing an online real-time ordering process over mobile networks, being designed to integrate easily and seamlessly with any ERP system.

SMART SELLING

GROW YOUR
BUSINESS
WITH US.

Our Services

Increase Productivity

Sales personnel able to collect accurate business data from the field using smart device and send the data back to the back-office systems electronically.

Operational Costs Optimization

By removing the paperwork burden, sales personnel and associated administration staff at the back-office will experience less administration costs in paperwork such as order/ collection entry.

Data Accuracy

Replacing paper with smart devices reduces double entry work and the potential for human errors in copying data from paper form to the computer through manual entry.

Better Customer Service

Almost real time transaction enables better customer service and customer satisfaction.
